

Production enhancement technologies

Build the optimal solution for your well

Production. Enhanced.

Hydraulic fracturing

Base proppant technologies

	Proppant functionality enhancement			Production assurance				Fracture evaluation	
	Flowback/ fines control	Pack integrity	Frac fluid clean-up	Scale	Salt	Paraffin	Sulfide	CARBO ceramic wells	Sand/3rd party ceramic wells
	CARBOBOND Resin coating	FUSION Proppant pack consolidation	RPM Relative permeability modification	SCALEGUARD Scale-inhibition	SALTGUARD* Halite-inhibition	PARAGUARD* Paraffin-inhibition	H2SGUARD* Sulfide-inhibition	CARBONRT Inert tracer	CARBONRT ULTRA Inert tracer
Ultra-conductive ceramic proppant									
KRYPTOSPHERE LD	●	●	●	●	●	●	●	●	
KRYPTOSPHERE HD	●	●	●	●	●	●	●	●	
High-transport ceramic proppant									
CARBOAIR				●	●	●	●	●	
High-performance ceramic proppant									
CARBOECONOPROP	●	●	●	●	●	●	●	●	
CARBOHYDROPROP	●	●	●	●	●	●	●	●	
CARBOLITE	●	●	●	●	●	●	●	●	
Sand/other									
CARBO NORTHERN-WHITE			●	●	●	●	●		●
3rd-party proppant				●	●	●	●		●

Additional applications

Additional technology applications

	FUSION	SCALEGUARD	SALTGUARD*	PARAGUARD*	H2SGUARD*	CARBONRT	CARBONRT GP
Acid frac		●	●	●	●		
Cement evaluation						●	
Frac and pack integrity for sand control, injection and producing wells	●	●	●	●	●		
Gravel pack evaluation	●						●

KEY

- Functionality manufactured in/on base proppant
- Proppant-delivered technology blended with base proppant

* Field Development Product

Note: This information is a guide to the available technologies and compatibility. Please contact your local representative to discuss the technology specification and configuration with your application.
