

POLY BERM

ASSETGUARD
A CARBO business

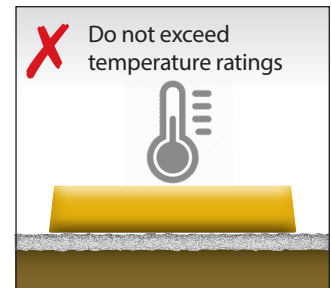

Installation and usage instructions

Thank you for choosing a POLY BERM multipurpose containment berm. When installed and maintained properly, you can expect years of worry-free usage. We've provided the following guidelines to ensure proper installation and maintenance.

Usage guidelines

1. Use POLY BERM to establish a perimeter around tanks, equipment, storage vessels, pipes or valves.
2. Add a GROUNDGUARD liner to create a secondary containment or use as a stand alone system.
3. Follow SSPC standards and procedures to seal POLY BERM into GROUNDGUARD or other geomembrane liners using spray-applied polyurea.
4. Never modify product by cutting, drilling or otherwise penetrating the surface.
5. Be sure that any object or equipment placed on POLY BERM has no sharp points or protrusions that could puncture the product or its coating.
6. User is responsible for chemical compatibility. See our chemical compatibility sheet for a list of compatibility ratings for common industrial chemicals.
7. Maximum long-term temperature exposure should not exceed 165°F (74°C).
