

ACCUCAST LB

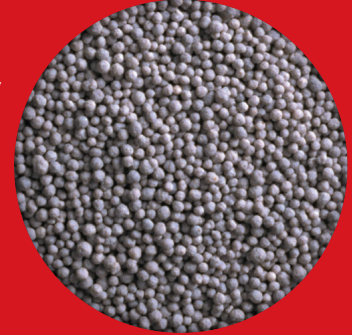

Ladle backing media

Features

- Exceptionally round grains with spherical structure
- Lighter, lower density than silica
- Chemically inert and does not produce respirable silica dust

Benefits

- Increased ladle life
- Can be recovered and reused indefinitely
- Spherical shape provides better fill for better support on ladle liner
- Improved QHSE and sustainability

Particle size properties

Sieve No.	ACCUCAST LB
16	5
20	94
30	1
