

ACCUCAST BM

Ceramic bedding media

Features

- Exceptionally round grains with spherical structure
- Chemically inert and does not produce respirable silica dust

Benefits

- Spherical shape provides better movement and holds mold better
- Improved QHSE and sustainability

Chemical and physical properties

Typical sizing (%)

Sieve Size (mesh)	ACCUCAST BM
16	0
20	0-60
30	0-50
40	0-40
50	0-40
70	0-30

Chemical composition (weight %)

Al ₂ O ₃	60-80
SiO ₂	10-20
Fe ₂ O ₃	>5
