

Real-time frac operations management platform

Features

- **PLANNING** – Create and manage activity logs with ease and simplicity
- **LOGISTICS** - Easily track deliveries and inventory
- **FLEET UTILIZATION** – Track NPT and manage personnel, equipment and maintenance
- **INVOICING** – Field ticket creation, estimation and approval
- **REPORTING** – Auto-generate customizable reports for orders, BOL's, stage data, daily updates and post job summaries

Benefits

- Manage frac operations from a single, centralized platform
- Drive operational efficiency with streamlined workflows
- Real time monitoring of frac operations
- User-friendly, cloud-based software for fast field adoption and access from anywhere

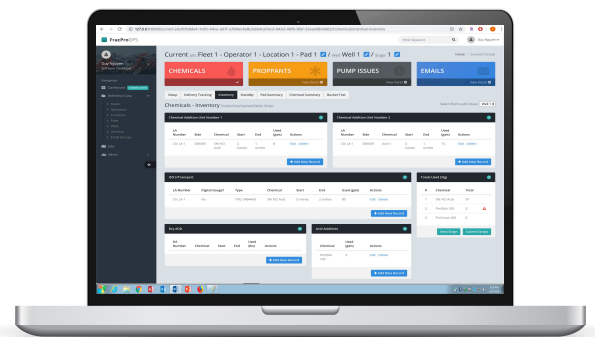

FRACPRO OPS is a powerful cloud-based fracturing operations support platform that assists in material balancing, activity tracking, field ticket generation, maintenance and reporting.

Manage resource intensive frac operations from materials to process to people

Streamline workflows and stay in front of operating expenses with FRACPRO OPS real-time frac operations management software. Track chemical and proppant inventory, usage and deliveries for each stage, while continuously monitoring equipment performance and maintenance to minimize downtime. FRACPRO OPS facilitates NPT evaluation across all parties, distributing performance metrics automatically via stage and activity analytics reports. Optimize personnel assignments and detailed wellsite activities across all fleets and simplify procurement processes through vendor management and embedded price books for easy ticketing and inventory tracking.

Fast and accurate data flow to facilitate today's most efficient frac operations

Maximum efficiency is achieved through single point data entry and referencing to minimize human errors. Wellsite deliveries can be streamlined by entry via QR code scanning. Reference data for chemicals and proppants are stored in manufacture specific libraries that are easily navigable and expandable. Frac stage material balance planning is managed through a streamlined workflow of modules from setup, stage consumption to invoice, reducing errors for the most aggressive frac schedules.

With FRACPRO OPS, you can stay up-to-date on the state of your field projects from your web-browser. Review your performance, and generate financial & operational reports for any time period and scope.
